

Getting Started — Students

1. Log in with the account your institution provided (or the one you registered at an event).
2. Open **Courses** and enrol in your assigned course — enrolment carries over to the learning environment automatically; no second login is needed.
3. Work through the course activities; your progress and grades are tracked in the course's grade book.
4. Join your project team on the **Teams** page to collaborate on assignments.
5. Ask questions in the **Forum**; your mentors watch it regularly.
